

Introduction to AIAG-VDA FMEAs Training Course

Objectives

- Understand the systematic approach that FMEAs take to identify and reduce risks.
- Describe the differences between Design and Process FMEAs.
- Learn the steps for conducting an AIAG-VDA FMEA at a conceptual level.
- Describe the "Failure Chain" concept in FMEAs.
- Understand how evaluation criteria is used to rate the levels of Severity, Occurrence and Detection.
- Become aware of how Action Priority Tables establish Action Priority (AP) levels for potential risks.
- Know what the Five T's are and how they are used to ensure successful FMEA team start-ups.
- Define the six best practices for conducting FMEAs.
